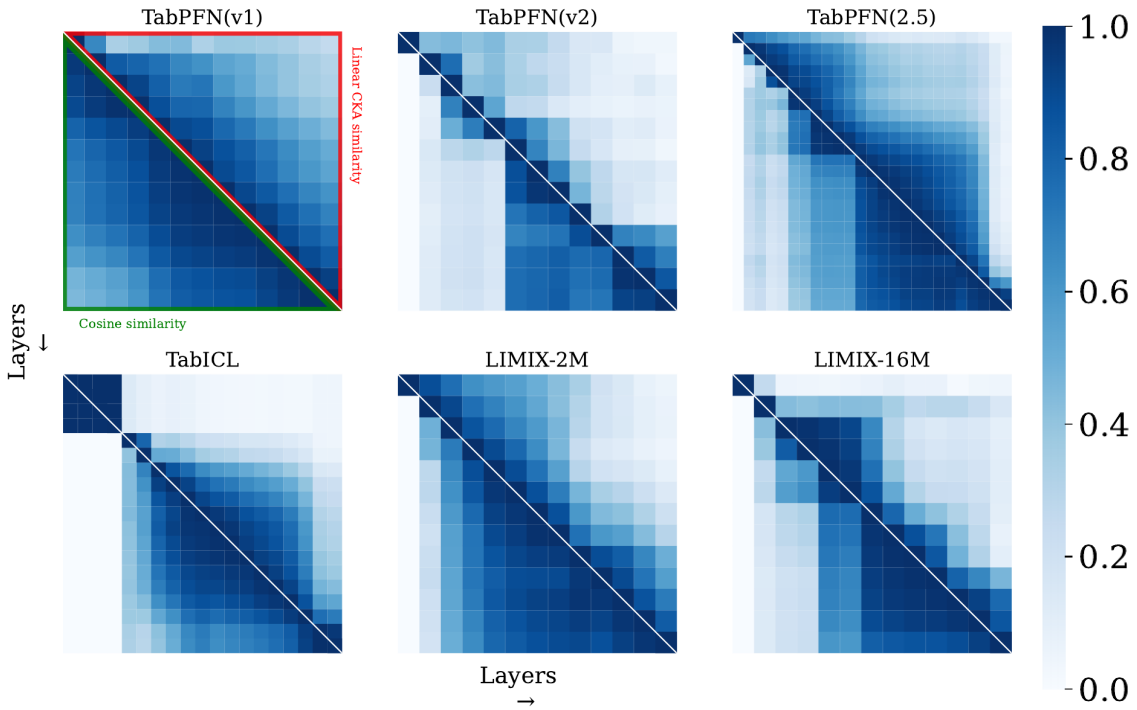
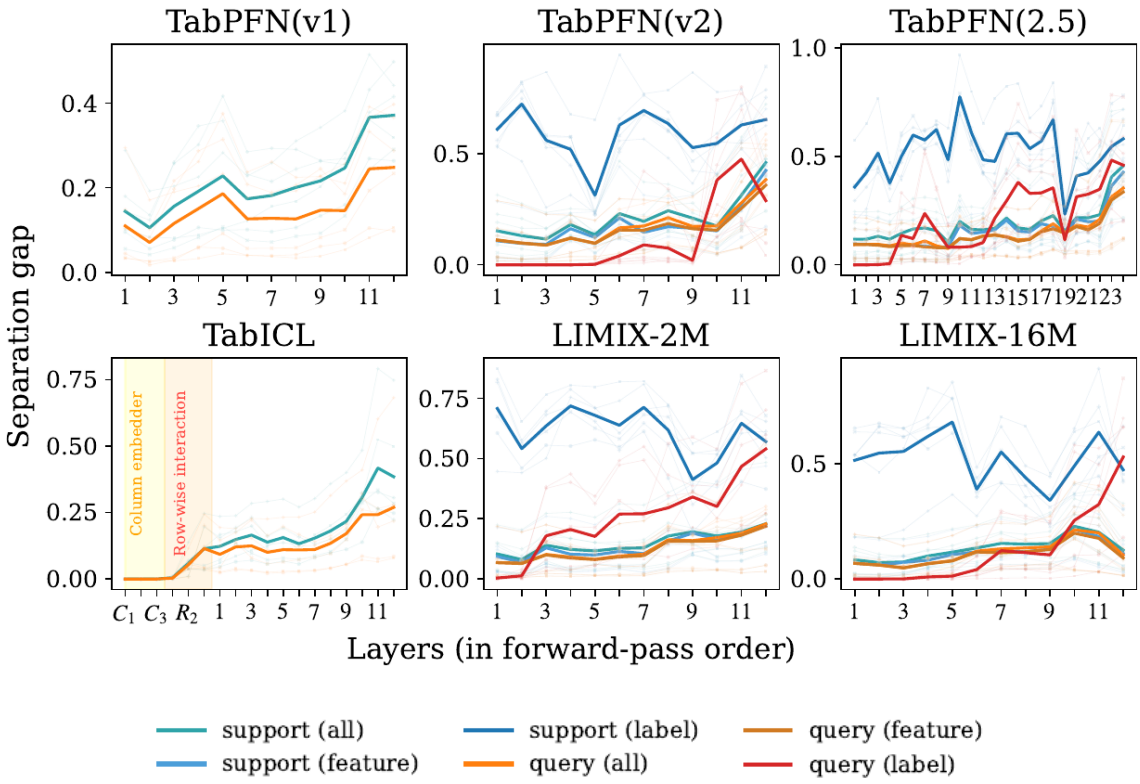
Multiclass Results

Here we provide the results for multiclass problems. We use all 8 multiclass tasks available in TabArena (excluding two datasets due to memory constraints).

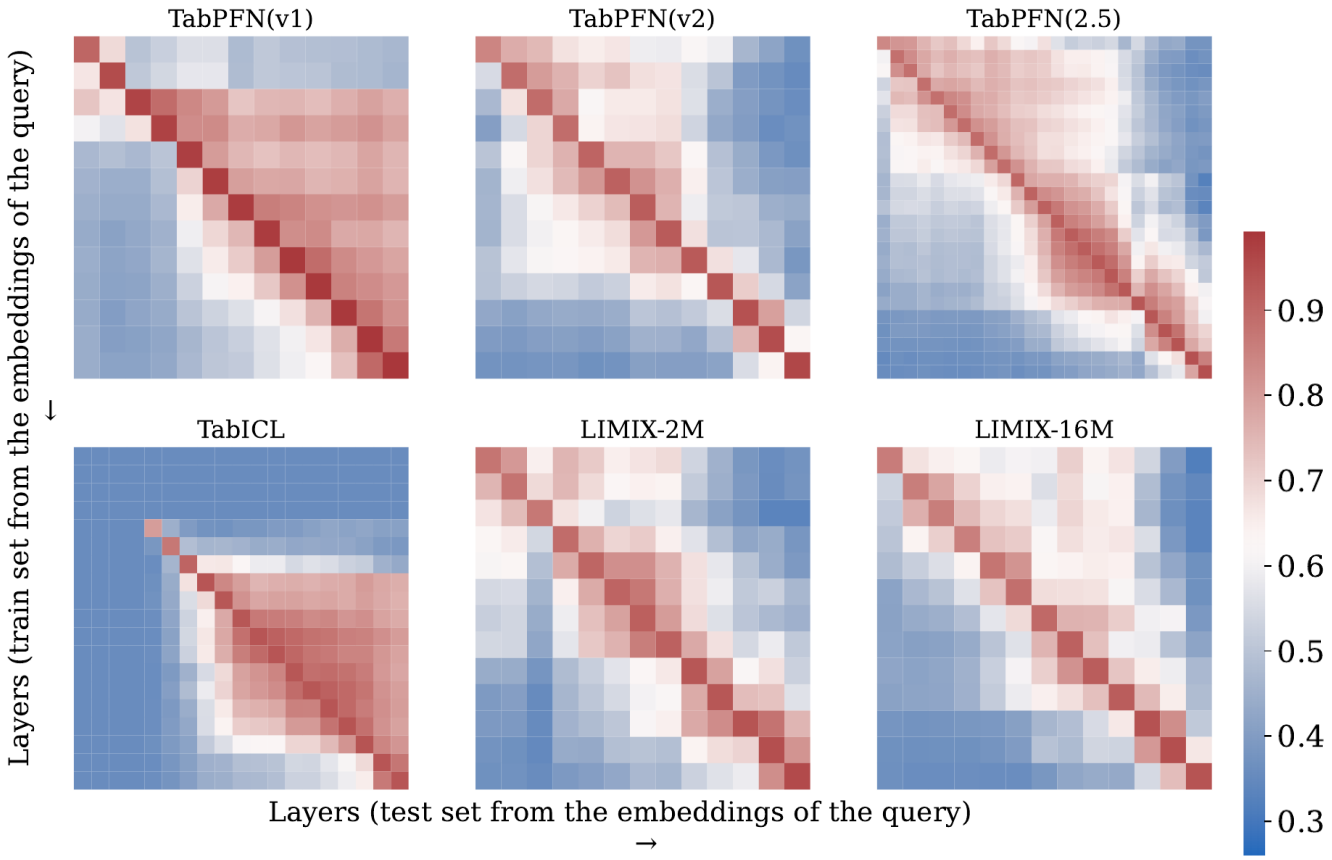
Exp 1. Embedding Similarity



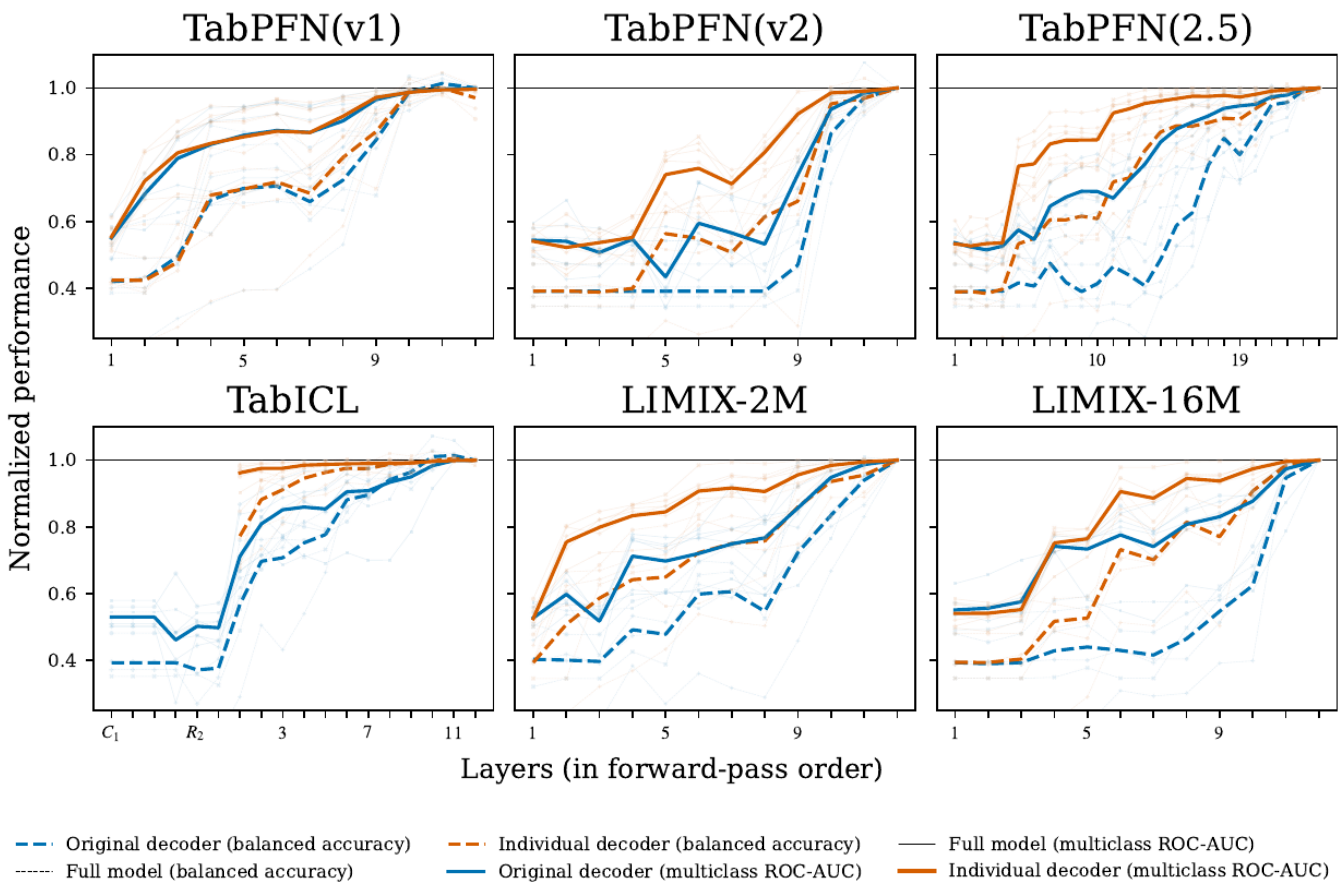
Exp 2. Separation Gap



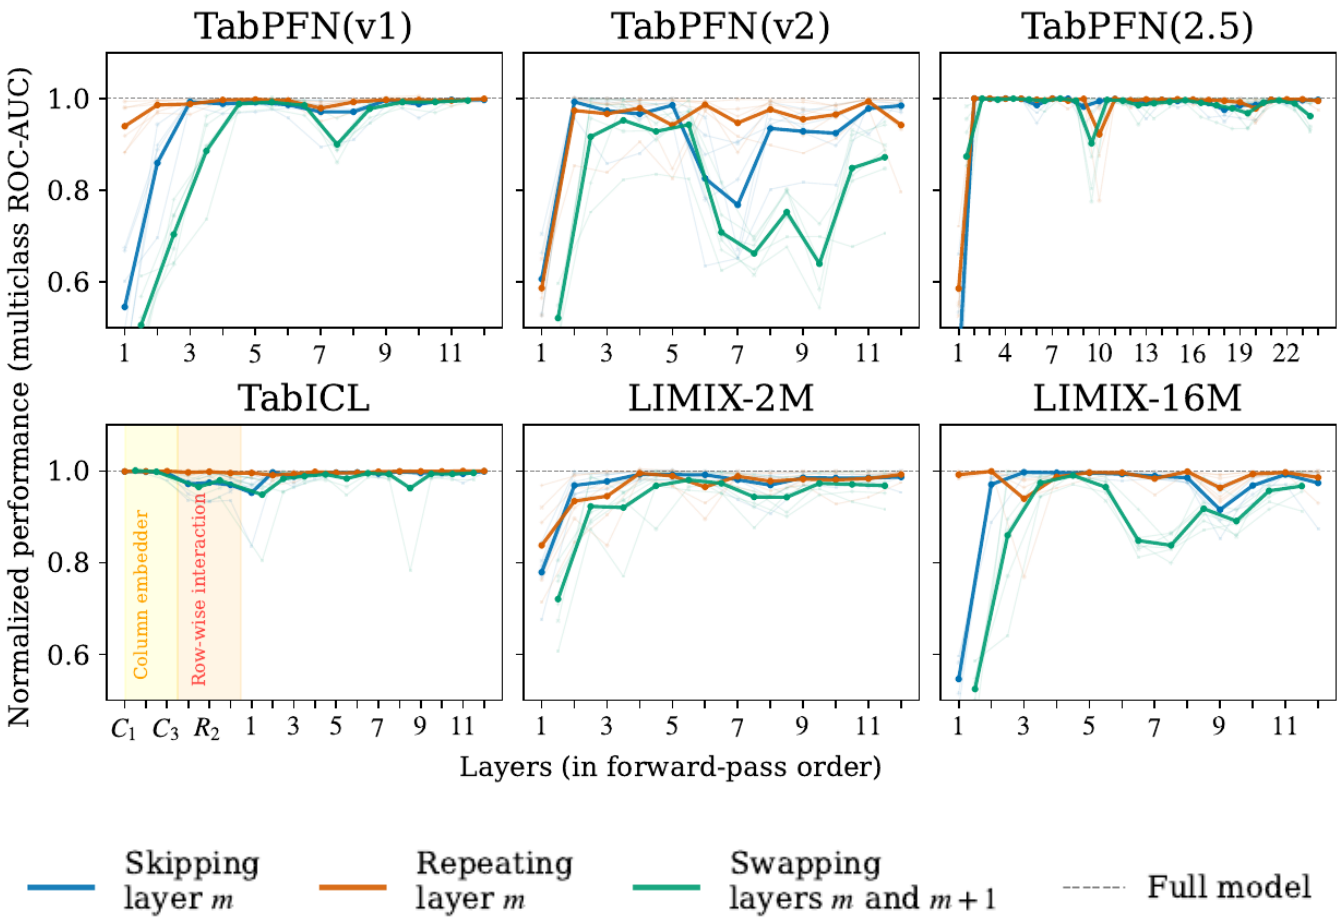
Exp 3. Probing Classifier



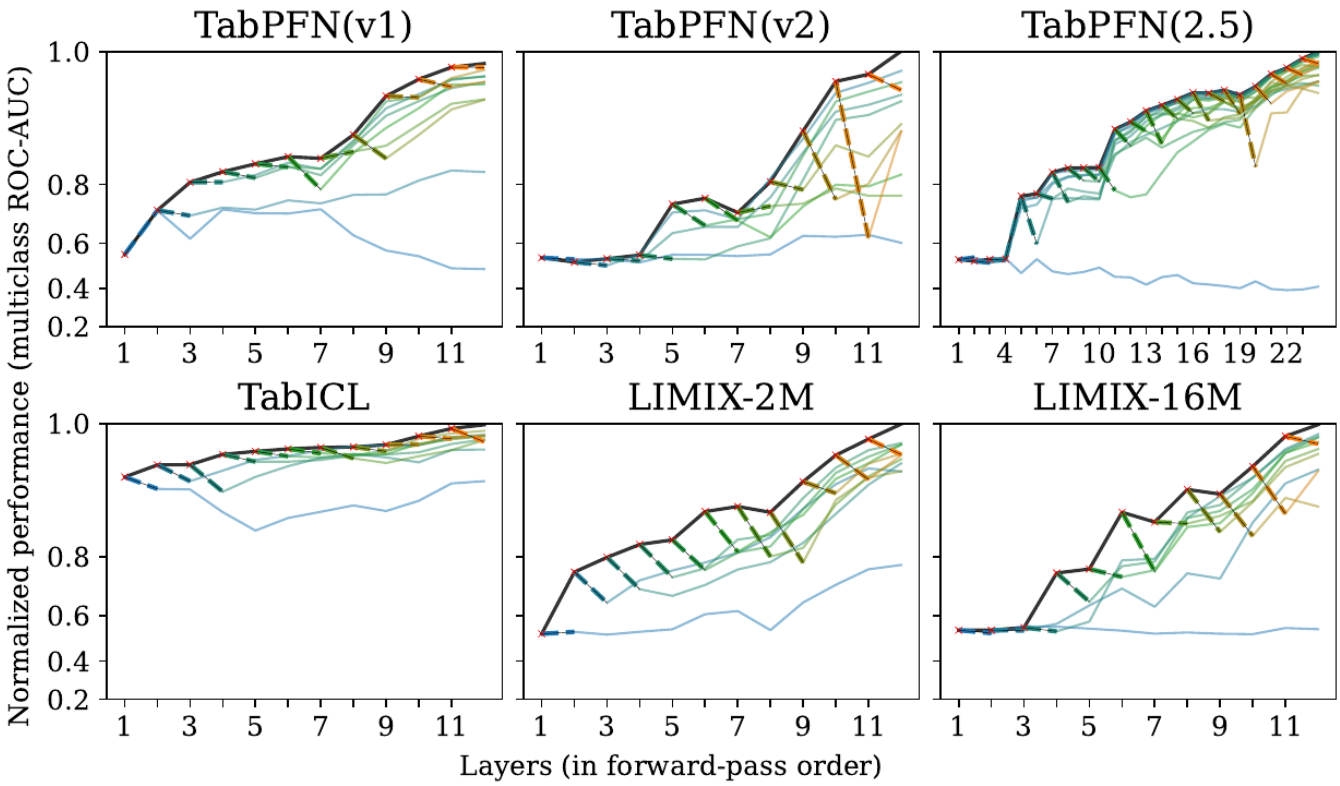
Exp 4. Tabular Logit Lens



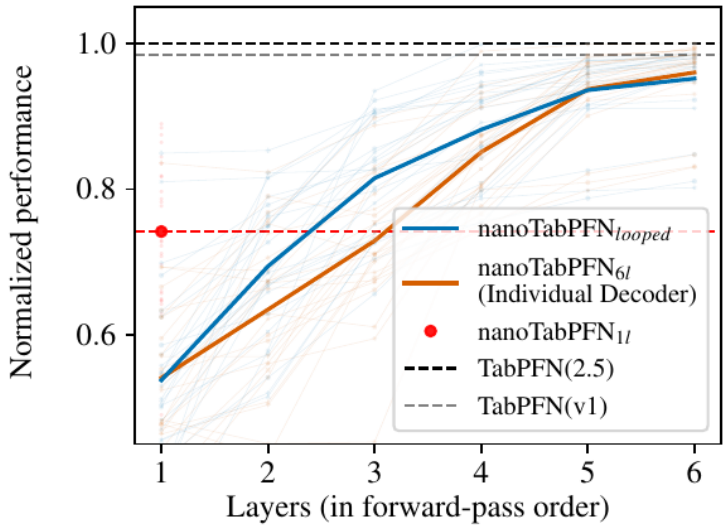
Exp 5. Layer Interventions

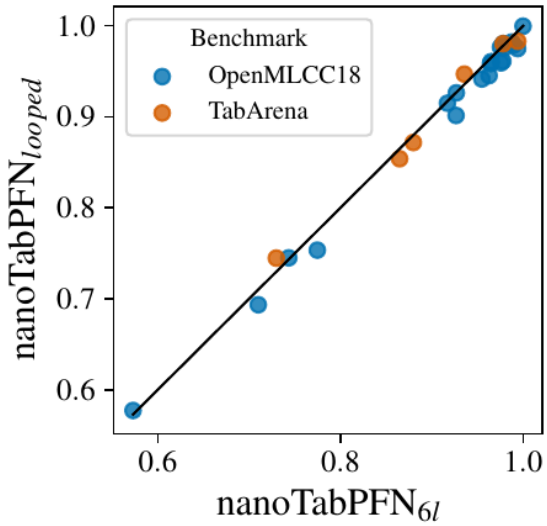


Exp 6. Self Repair (Skipping Layer)



POC: Is One Layer Enough?





In addition to multiclass tasks available in TabArena, we evaluated the models on 20 multiclass tasks available in OpenML-CC18.
