Multiclass Results

Here we provide the results for multiclass problems. We use all 8 multiclass tasks available in TabArena (excluding two datasets due to memory constraints).

Exp 1. Embedding Similarity

Exp 2. Separation Gap

Exp 3. Probing Classifier

Exp 4. Tabular Logit Lens

Exp 5. Layer Interventions

Exp 6. Self Repair (Skipping Layer)

POC: Is One Layer Enough?

In addition to multiclass tasks available in TabArena, we evaluated the models on 20 multiclass tasks available in OpenML-CC18.
